ELSEVIER

Int. J. Miner. Process. 49 (1997) 237

INTERNATIONAL JOURNAL OF MINERAL PROCESSING

Contents of Volume 49

Research Papers

Tricalcium aluminate hexahydrate (TCA) filter aid in the Bayer industry: factors affecting TCA preparation and morphology
B.I. Whittington, T.M. Fallows and M.J. Willing 1

Effect of oxidation on the collectorless flotation of chalcopyrite
G. Fairthorne, D. Fornasiero and J. Ralston 31

Removal of ferriferous dolomite by magnetic separation from the Egyptian Abu Tartur phosphate ore
P. Blazy and E.A. Jdid 49

Improving jigging results of non-ferrous car scrap by application of an intermediate layer
T.P.R. de Jong and W.L. Dalmijn 59

Dependence of separation properties on flocculation dynamics of kaolinite suspension
D.K. Sengupta, J. Kan, A.M. Al Taweel and H.A. Hamza 73

Removal of graphite from lead rougher concentrate using water-only cyclones
D.P. Patil, K.U. Bhaskar, M.R. Jakhu and T.C. Rao 87

Investigation on reduction of cement binder in cold bonded pelletization of iron ore fines
D.K. Dutta, D. Bordoloi and P.C. Borthakur 97

Settling and filtration characteristics of fine alumina trihydrate slurry
I.N. Bhattacharya 107

Announcement 119

Research Papers

The activation of sphalerite by lead — a flotation perspective
W.J. Trahar, G.D. Senior, G.W. Heyes and M.D. Creed 121

The influence of cyanide on pyrite flotation from gold leach residues with sodium isobutyl xanthate
J.R. de Wet, P.C. Pistorius and R.F. Sandenbergh 149

Study of Merrill-Crowe processing. Part I: Solubility of zinc in alkaline cyanide solution
G. Chi, M.C. Fuerstenau and J.O. Marsden 171

Study of Merrill-Crowe processing. Part II: Regression analysis of plant operating data
G. Chi, M.C. Fuerstenau and P.A. Anderson 185

A model for eddy current separation
P.C. Rem, P.A. Leest and A.J. van den Akker 193

Reduction of double layered iron ore pellets
T. Sharma 201

Xanthate adsorption on Pb contaminated pyrite
C.C. Sui, S.H.R. Brienne, Z.H. Xu and J.A. Finch 207

Analysis of single-particle breakage by impact grinding
P.C. Kapur, D. Pande and D.W. Fuerstenau 223
